

## Byte-Sized Brain Break

Family Activity

You can make an animation by taking or making pictures of something that show the process of it moving. Take or draw pictures of someone in your family making funny faces or at different stages of doing a task. Flip through the pictures quickly to make your animation come to life!

## Byte-Sized Brain Break

Family Activity

Play hide and seek with your family. When it's your turn to seek, try out different strategies for finding everyone. **Brute force** is when you look every single place - it takes a while, but it always works! You can also focus on areas that you think are big enough to hide someone, or listen for noises!

## Byte-Sized Brain Break

Family Activity

Choose an item that you have a lot of in your house. It can be doorknobs, tiles, pillows, or something else! With your family, move as a group from room to room. Every time you enter a room, count how many of that item you see. Keep your item count to yourself, and add to it as you go. When you've gone through all the rooms, have everyone share their item totals and see who was right!
